Installation tutorial:

Remove the pre-assembled MASTER-Connect joint tape from its box.

Remove the horizontal waterstops (ribs) on both sides, at the front and back to the depth of insertion using a sharp utility knife.

It is essential to ensure as smooth an insertion surface as possible.

Insert the two ends of the joint tape into the MASTER-Connect joint tape connector until they are touching the bolts.

Use a torque wrench to tighten the bolts to 8 Nm torque
